On April 25, 2017, Utah State University broke ground on its new state-of-the-art Life Sciences Building to be constructed immediately to the north of the Eccles Conference Center. We’re very excited for this new neighbor and the opportunities it will present to our campus community. This building project is scheduled for completion in January 2019.

Monday, May 8, 2017 marks another phase of the campus-wide steam conversion. This project will limit access to the green area between the Taggart Student Center (TSC), the University Inn, and the Geology and Animal Science buildings. The steam project will be completed by September 2017.

Monday, May 8, 2017, demolition and construction of the bridge connecting the Taggart Student Center (TSC) to the University Inn will begin. The hotel’s west exit on the lobby level (2nd floor) will not be accessible until September 2017. Guests may exit the west side of the hotel by entering the stairwell on the lobby level and exiting on the lower level (1st floor). Daily work hours on the bridge will be from 8:00 am to 6:00 pm.
